BIRD SCALE

SUPERIOR CONTROL OVER BIRD WEIGHT UNIFORMITY

One of the best ways to manage a poultry flock is to control their average body weight and uniformity.

The Scale System is the most complete bird weighing system on the market.

It automatically weighs, records and performs all the statistical calculations needed to optimize the weight control of your flock. With the scale, you can effectively track and manage your yields, ensure that you reach your targets and make better decisions regarding the management of your production.

• A single controller can monitor up to six platforms.

UNIQUE DURABLE COATING

- · Made of polyurea elastomer
- LIFETIME warranty on the plate!
- · Water & dust resistant
- · Pressure washer safe
- Anti-skid

TECHNICAL SPECIFICATIONS

- 20 inch diameter steel platform
- · 25-pound platform for extra stability
- · Easy to install and setup
- · Stainless steel hanging rod
- · Outstanding accuracy
- · Exceptional weighing speed
- · Chain & hook included
