

Take Production Levels to NEW HEIGHTS!

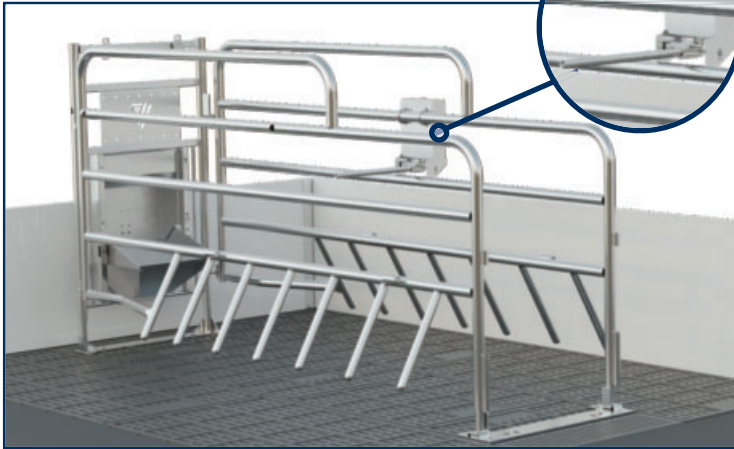

- Reduce piglet crushing.
- Wean more pigs.
- Save time.
- Increase profitability.

Pair with the Integra floor system to give you exceptional stability, premium traction and tremendous durability.

HOW IT WORKS

Down position

When sow stands, her back lifts the activation spring, raises the crate and prevents piglets from going under the sow.

Raised position

In the raised position, the piglets can't get under the sow, which reduces the possibility of crushing. When the sow lays back down, her back no longer lifts the activation spring and the crate slowly lowers to allow for nursing.

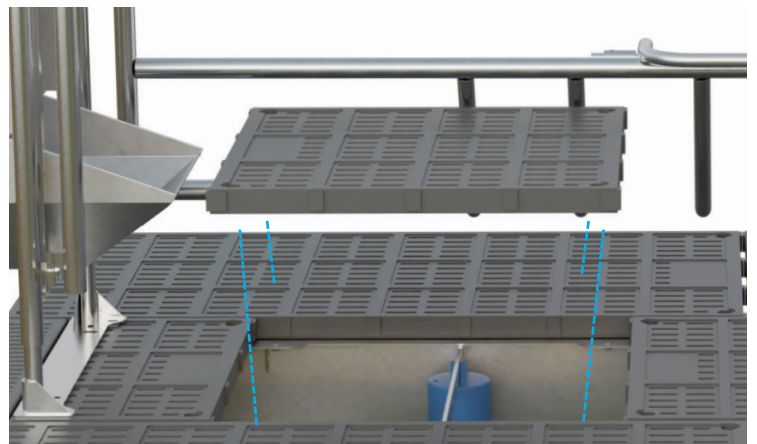

Auto Up-Down

The Canarm Lift crate has 4 air cylinders operated by a control switch mounted in the hall way (1 per row). The control can be set to up, down or auto. Auto will raise in individual crates when the activation spring is triggered.

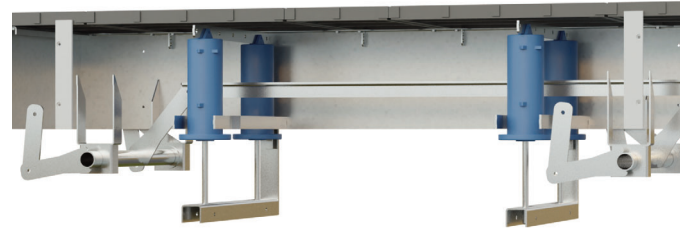

SERVICING MADE EASY

With built-in service panels, the pneumatic serviceability has never been easier. Simply remove the Integra floor piece with 4 bolts, lift the floor out, and you'll have easy access to the pertinent equipment. The crate itself does not need to be removed.

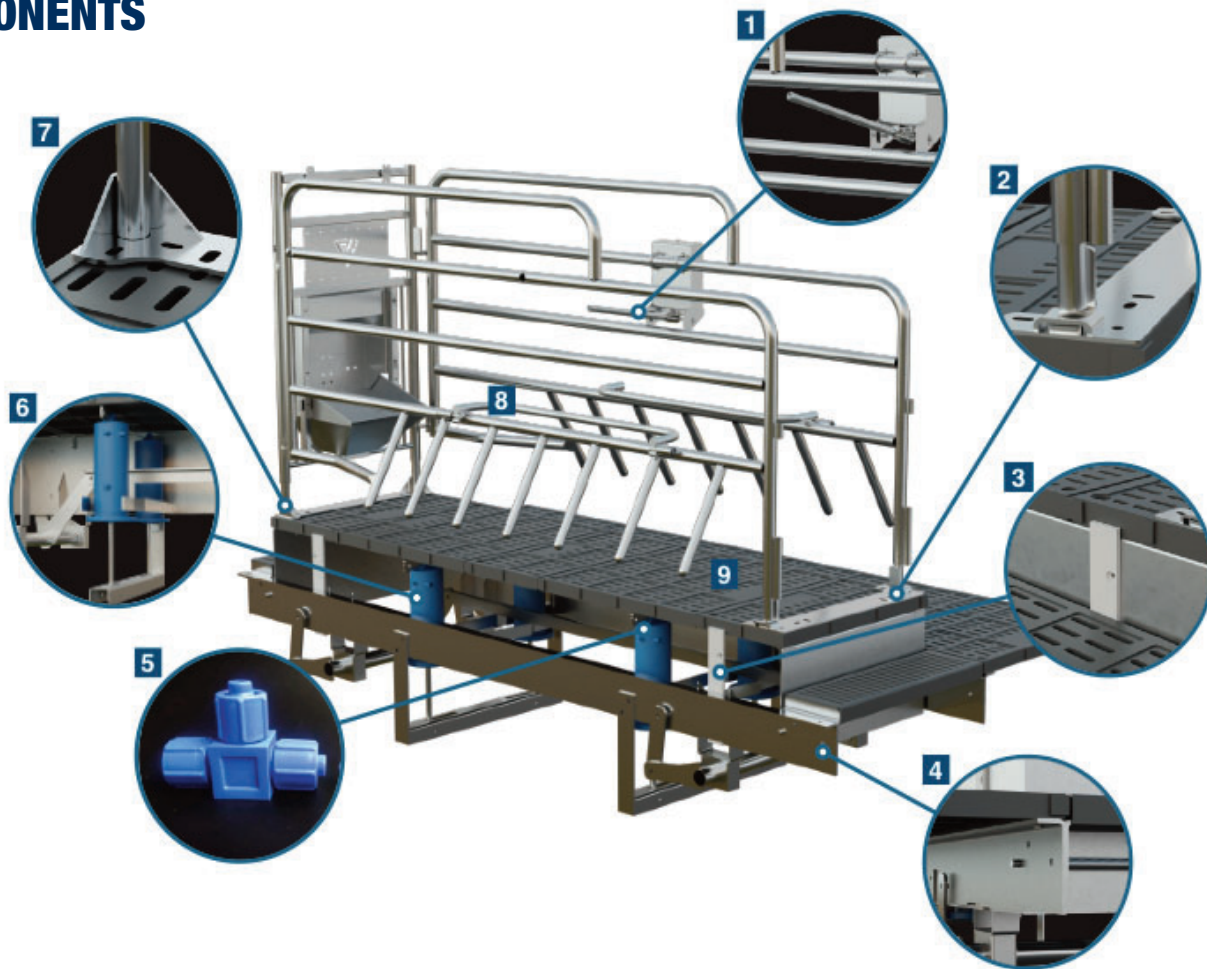

HIGH QUALITY LIFT SYSTEM

The Canarm Lift Crate has 4 air cylinders operated by a control switch mounted in the hall way (1 per row). All our cylinders are made of the highest quality PVC, and have heavy duty stainless steel shafts for corrosion resistance. If one of the cylinders, malfunctions or breaks, the lift system will still operate. To increase confidence in a leak-free system, all pneumatic fittings under the crate, or in concealed areas are compression fittings (NOT push-in fittings). 4 PVC glider strips are provided to prevent wear and tear on the galvanized lift box during operation.

COMPONENTS

1. Stainless activation spring.
2. Stainless steel legs & foot plates at front and back.
3. PVC glider strips on side of lift box minimizes wear and tear.
4. Super heavy duty galvanized support rails.
5. All pneumatic fittings under the crate are compression fittings, not push-in fittings, thus ensuring no air leakage.
6. PVC cylinders & stainless steel shafts.
7. Heavy duty gussets on front arch.
8. Anti-crush bars.
9. Built-in service panels.

GENERAL INFORMATION

Our farrowing crate options combine maximum versatility for the producer with increased comfort and productivity. Standards are changing rapidly and we are adapting our crate design to meet the needs of producers of sow and piglets. We've made crates easy to order and suitable for many different layouts.

All Farrowing crates come with:

- Finger or Bow Bar option.
- Galvanized frames.
- SS feet.
- Multiple side panel sizes (84", 90", 96").
- Anti-crush bars.

And can be configured into many combinations to suit your needs:

- Conventional (Front and Back aisle).
- Euro-style (sow can enter and leave the back of the stall).
 - Head to Head.
 - Head to Wall.
 - Turn Around.

CREEP PLANKING

- Made of rigid PVC plastic.
- Designed with ease of cleaning in mind.
- Durable - will not rust or rot.
- Quick and easy to install, no glue required.
- Will not harbour bacteria.

CREEP FEEDER

- Low to ground, providing easy access for piglets.
- Dividers prevent piglets from contaminating feed.
- Locks into place, removal is easy for cleaning.
- Made of stainless steel.

HOT WATER HEAT PANELS

- Energy efficient hot water heat panel fastens to the floor at each corner.
- Low radiation to save heat.
- Available in sizes to fit both the farrowing and weaner rooms.
- High conductivity for efficiency.
- Can be easily adapted to any flooring system.
- Panels install quickly and easily.

HEAT LAMP HOLDER

Adjust heat lamp to a safe distance away from the sow and piglet and make sure they are secure.

1 PIECE CREEP PLANK 1 3/8" WIDE X 20" HIGH

- Easy to clean
- Stronger
- Tough durable plastic
- Easier installation
- Top cap also available
- Will not harbour bacteria.

DRINKER PACKAGES

- Available in stainless steel or galvanized.
- Piglet drinkers available as nipple drinkers or water cups.

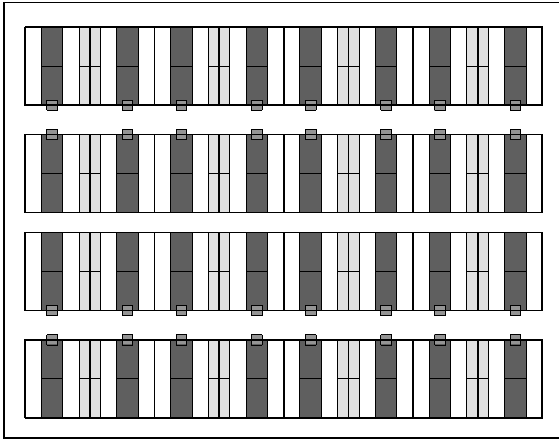

ORDERING GUIDELINES

1. Confirm Room Layout (See Crates-5):
 - a. Conventional
 - b. Euro
 - c. Euro Stand Alone
 - d. Euro Head to Head
 - e. Euro Head to Wall
 - f. Turn Around
2. Select a Farrow crate that functions in the chosen layout (See Crates-6-12)
3. Select the Options to complete the Farrow crate (See Crates-13-15):
 - a. Side Mount Bumper (2060630A) - Strongly Advised: Pushes gilts & small sows forward in the crate
 - i. Add the Lynch Pin (2060633)
 - b. For the Conventional Farrow crate only: Add pvc plank 7/8" x 20" for the back gate
(PN – 2060395-240 or 2060395-288)
4. Select a SS Feeder for Sow - Advised
 - a. 2060107 - 16 ga SS Quick Release Feeder (Most common choice, other options are available)
 - b. Consider the iFeed & Extension Hopper (hopper optional)
5. Select a SS Drinker Package (2150130-S) - Advised
6. Select SS Sow & Piglet Nipples - Advised
 - a. Choose 1 nipple for the sow and 1 lower nipple for the piglet
7. Floor Fasteners
 - a. When choosing the floor fasteners, factor in the type of floor the crate will be fastened to
8. Select Additional Crate Options - Optional:
 - a. SS Piglet Feeder
 - b. Card Holder

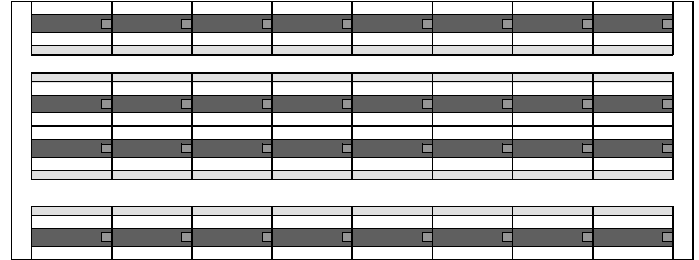

OTHER FARROWING ACCESSORIES

1. Go to Penning Section to order creep plank
 - a. By default the Farrow crate comes with a 1 3/8" channel (other channel widths available by special order)
 - b. SS Gate Posts & PVC Gate Ends are available in the Penning Section
2. Go to Flooring Section to order flooring type
 - a. Integra Flooring
 - i. Consider the integrated heat plates
 - b. Cast & Plastic for piglets
 - e. Aluminum Heat Plates
3. Go to Heat Lamps & Bulbs Section to order heat lamps and controllers
