

VKM-ANTIRADON SERIES

Inline Centrifugal Metal Fan

VKM-AntiRADON fans are specially designed with high pressure capabilities for radon mitigation applications.

The fans are specifically designed for radon extract ventilation of basements, cellars, crawl spaces, etc. Compatible with Ø 4", 5", and 6" round air ducts.

Installation is simple with the supplied mounting brackets.

FEATURES

- Voltage: 120V, 60Hz.
- Motor: Single-phase external rotor motor with backward curved centrifugal impellers.
- Duct compatibility: Ø 4", 5", 6".
- Suitable for airstreams up to 122° F.
- IP X4 protection.
- Thermal overload protection.
- Mounting bracket included.
- 2 year warranty.

High efficiency backward inclined impeller delivers exceptional airflow even in high static pressure systems.

Dynamically balanced impeller ensures vibration free operation

Factory sealed case, no leakages UV resistant durable UL94 certified plastic

Ball bearings motor ensures low-noise and maintenance-free operation

German made high-efficient external rotor motor

Mounting brackets included

PERFORMANCE SPECIFICATIONS

MODEL	DUCT DIA	RPM*	SONES*	WATTS*	AMPS	CFM vs. Static Pressure (PS0 in WG)											VOLTS
						0"	0.125"	0.2"	0.25"	0.375"	0.5"	0.75"	1.0"	1.25"	1.5"	2.5"	
VKM-AR 100	4"	3000	6.91	108	0.90	174	167	162	159	151	142	124	106	84	60	-	120
VKM-AR 125	5"	2950	6.8	112	0.97	239	228	222	217	205	192	165	130	102	72	-	120

VKM-ANTIRADON SERIES

SOLVE YOUR RADON PROBLEM EFFECTIVELY AND QUICKLY WITH VKM-ANTIRADON FANS.
VKM-ANTIRADON FANS MEET REQUIREMENTS SPECIFICALLY FOR RADON REMOVAL.

HOW TO MITIGATE RADON CONCENTRATION

Prevent RADON from entering the living quarters from basement by:

- General ventilation improvement
- Installation of Radon Extraction system in basement
- Underfloor ventilation reinforcement
- Installation of positive pressure or ventilation system

VENTILATION is one of the best ways to eliminate radon from your home.

INSTALLATION

Radon is a colorless, odorless and tasteless natural radioactive gas that can be found anywhere in nature. It is produced by the decay of uranium in soil. Radon becomes a problem when it is trapped in a building and becomes concentrated.

The most effective radon reduction method is the installation of fans that can vent the elevated level of radon outside.

BASEMENT INSTALLATION

The VKM-AntiRADON fan is fixed on the wall. The polluted air is extracted at roof level. The air ducts must be located at least 10' away from any window.

ATTIC INSTALLATION

VKM-AntiRADON fan installed in the attic.

For airtight installation of VKM-AntiRADON fan, rubber collars with stainless clamps are recommended.

*Not supplied with the fan.

ACCESSORIES

For more information on available accessories, see Accessories & Motors section.
