JULY 2022

We've Done it Again!

Platinum member

Canarm is a 2022 winner of the Canada's Best Managed Companies Platinum Club designation, having retained our Best Managed designation for nine consecutive years.

Our employees are one of our greatest assets and we could not have achieved this distinction without the dedication and hard work of Canarm folks at all of our different facilities.

And of course, we wouldn't be where we are today without the continued support of our very valued customers.

So we would like to say THANK YOU to everyone who has made this achievement possible and we look forward to serving you for many, many years to come.

Canarm "Cow Girls"

Sales Reps Ruth and Kristen are udderly friendly and knowledgeable "cow girls". They showed company spirit and got lots of smiles as they toured their way through the departments at our Arthur facility in their inflatable cow costumes. They also evaluated some products in our showroom from the cows' perspective!

And if these photos don't "moove" you, check out Ruth & Kristen later in the newsletter in their pig costumes!

Customer Testimonial

The Canarm wet/dry feeders are the best feeders that I have ever used and are a big help when trying to feed pigs.

New Product

Lift Crate

Take Production Levels to new HEIGHTS!

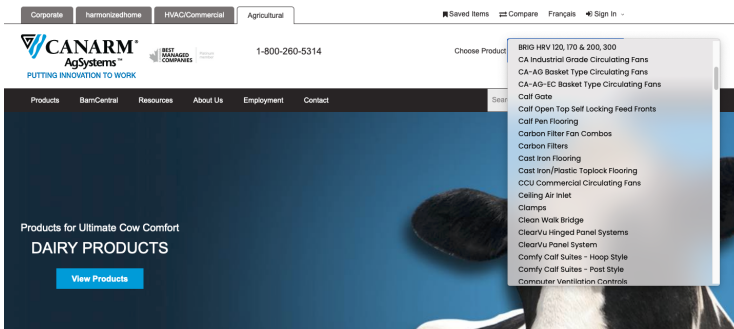

- Reduce piglet crushing.
- Wean more pigs.
- Save time.
- Increase profitability.

In the down position, when sow stands, her back lifts the activation spring, raises the crate and prevents piglets from going under the sow. Once in the raised position, the piglets can't get under the sow, which reduces the possibility of crushing.

When the sow lays back down, her back no longer lifts the activation spring and the crate slowly lowers to allow for nursing.

Web update to serve you better

We've added a handy product finder to our Agricultural web pages to make it quick and easy to find whatever product you're looking for! Check it out at www.canarm.com/agriculture

Happy 150th Anniversary Arthur, Ontario!

Canarm AgSystems is proud to have been a part of the amazing Arthur community for the last 50 years.

One of the key benefits of natural ventilation is that in the summer you really don't have to do anything. The sidewalls remain wide open 24/7 and Mother Nature takes care of the rest.

Ensuring animals have access to plenty of clean, fresh water is very important in hot weather. If you have supplementary summer power ventilation (Panel Fans, Cyclone Fans, HVLS Fans), be sure that they are all functioning properly.

Open Houses

Pfister Dairy Farms in Mitchell, ON. Equipment supplied by Keith Siemon Farm Systems. Barn features Canarm gates, self lock, freestalls, waterers and feed bunk divides

Van De Walle Dairy barn. This beautiful new facility features Canarm freestalls, gates, feed fronts and waterers. Another great job by Avonbank!

Field trip for our Arthur folks

Our Arthur crew recently took a field trip to a barn under construction in Guelph, ON. Job is being completed by Frey Building Contractors.

Pig Shows
