

Predictive Analytics

By Nora Wolske,
Ventilation Products & Controls Manager

Nora Wolske is the Ventilation Products and Controls Manager for Canarm AgSystems. She has over 18 years of experience working with livestock equipment and ventilation systems.

Nora recently wrote an article for the April 2018 issue of Canadian Poultry Magazine entitled **Predictive Analytics**. In it, she discusses how to take data that has always been readily available to poultry farmers to a whole new level of management.

What our Customers are saying about our NANO Control...

Paul Hagey
Whitefeather Farms
Oshawa, Ontario, Canada

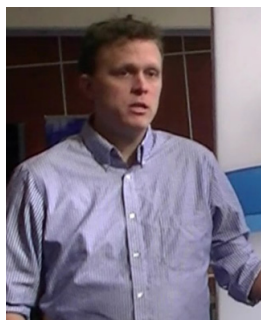

"The big selling feature {about the Nano} for us was the modular design and along with that comes the true bypass switches which allows you to manually override the controller 100% so that the electronics are separated from the brain. So if you had a power failure or if the brain actually failed on the controller, by flicking the manual override switch, the fans or inlets will open or close manually 100% which allows you to not have to worry about wiring in another set of contactors."

Jeff Spitters
Oranya Farms II Holdings Inc.
Aldergrove, BC, Canada

"The Nano now offers amperage readings on fans and motors, which allows for early maintenance. As motor performance deteriorates, we can replace it ahead of time as opposed to waiting until it fails."

Meet our newest Team Members

Mark Stam
Swine Products Territory Manager

Mark has an extensive hands-on agricultural background, including growing up on a pig farm and working in the University of Guelph swine research facility.

In addition to his biological studies at both Brock University and the University of Guelph, Mark has an extensive, 10+ years background in sales and customer service.

Mark can be contacted at Tel: 519-400-2472 or by email at mstam@canarm.ca

Nicholas Wilson
Poultry Territory Manager

Nicholas has an extensive sales background spanning over the last 19 plus years. For 7 of those years he was focused on greenhouses and garden centers.

Nicholas and his wife have spent the last 4 years living on farms caring for, and raising horses that were bred for jumping and competition.

Nicholas has a passion for agriculture and is sure to be a tremendous asset to our team.

You can contact him at Tel: 226-972-0975 or by email at nwilson@canarm.ca

Featured Products

FarrowFlex Crate

Designed to meet the exacting demands of Organic, Humane and GAP production systems, the Canarm FarrowFlex offers optional finger or bow bar piglet protection, adjustable length, and built in anti-crush protection. Sows can be loaded or unloaded in any direction – side, rear and front. It offers a finger or bow bar option, adaptable length and a built-in anti-crush bar. It is easy to assemble and features stainless steel foot and legs and multiple feeder options.

How To Videos

To ensure our customers get the best support possible, Canarm AgSystems is now producing educational How To Videos to assist users in the installation, usage and troubleshooting of our products. First up, join Chris Roelofsen (Lighting Products Manager and all around Smart Agricultural Farm Products Guy) as he looks at our heated livestock waterers and walks you through: how to adjust your thermostat, choosing a float cover, how to service or replace your valve and how to troubleshoot a frozen bowl.

Chris and our other knowledgeable representatives will be creating more videos over the next few month, so be sure to check back for new additions.
