MARCH 2018

The Language of LEDs

By Nora Wolske, Ventilation Products & Controls Manager

Nora Wolske is the Ventilation Products and Controls Manager for Canarm AgSystems. She has over 18 years of experience working with livestock equipment and ventilation systems.

Nora recently wrote an article for the February/March 2018 issue of Canadian Poultry Magazine entitled The Language of LEDs - What you need to know to get the best out of your lighting system. In it, she discusses the difference between LEDs and what you should ask your supplier to ensure that you are making an informed decision when upgrading or changing your lighting system.

Meet our Sales Team

Also featured in the latest issue of Canadian Poultry is our very own Customer Service Representative (and now part-time hand model), Richard Nauta.

Rich's hand is prominently shown on the cover along with one of our latest innovative products - the SOLO LED FLICKER FREE Light Dimmer control. **LEARN MORE ABOUT IT HERE.**

Quotes from our Customers

Solo Dimmable Lighting Control

"The flickering is gone. We just shipped the birds and believe it or not the catching crews couldn't believe how low we could dim. Before you couldn't – it was either too bright or the light bulb was off [...]
Now, we can go to a 1 or a 2 setting, and believe it or not it's a 1 or 2 just like a good old incandescent bulb, it's so low dimming; flicker-free low dimming."
