

## Simple, cost effective watering tips to maximize milk production

*By Chris Roelofsen,  
Lighting Products Manager*

**A clean fresh water supply is one of the most important things you can provide for your herd. And even though it may be a very low cost input item, it should be viewed as one of the most critical. There are several components to consider when reviewing your water supply but here are some of the most important to watch for.**

Let's first talk about some basic numbers. When calculating your herd requirements, you have to base it off some production parameters. For instance, to determine how much water a lactating dairy cow will need, you must consider the following:

1. 4-5 liters for every KG of dry matter intake or
2. 3.5-5 liters for every liter of milk produced

The second option is usually the easiest to calculate, since everyone follows output as one of the key production indicators for each cow.

Article appeared in  
October 2019 issue  
of Progressive  
Dairy Canada

With a herd average of 35 liters of milk per day, that means you need to supply up to 175 liters of water per cow per day. About 50-60% of that intake of water occurs within 1 hour of being milked so not only do you need to consider volume but positioning becomes important as well.

## What our Customers are saying ...

### Ed Bloetjes

*Dorchester, Ontario, Canada*

"I chose Faromor based on the quality of the product. I much prefer the larger sidewall opening and pipe drive system. It eliminated the need for cables and pulleys and was just a cleaner, easier system" - in regards to his new MaxAir Curtain System.

## Organizational Announcement

### Paul Fallis

**Director of Sales - Agricultural Products**

We are thrilled to announce that Paul Fallis, who has been with the company for over 20 years, has been promoted to Director of Sales – Canarm Ag Products.

In addition to leading the Canarm AgSystems sales team out of Arthur, ON, Paul will also be responsible for the newly acquired Faromor sales team in Shakespeare, ON.

**Congratulations Paul!!!**

# Canarm Acquires Faromor Ltd.

On September 3, 2019, Canarm Ltd. acquired Faromor Ltd., a leading manufacturer of natural ventilation systems based in Shakespeare, Ontario. The two companies have shared a close relationship over the years and with this acquisition, will combine their product lines to bring the best of both to the agricultural ventilation industry.

Canarm AgSystems is excited for this step forward in our vision to become a recognized leader in agricultural ventilation serving the dairy, swine, poultry and other agricultural markets and providing a proven solution for any farm anywhere.

## Giving Back to the Community

Our Arthur crew was once again out in the ditches picking up trash and beautifying the community. Thank you to the dedicated volunteers that do this twice a year to keep our roads and ditches clean.

## Work Hard, Play Hard

The Canarm Team is shown "hard at work" catching some indoor rays at the FCL Buymart in Saskatoon. Well, work hard, play hard - just remember to come back to work after the show is over!!

## Missed us at World Dairy Expo?

Here's a recap of some of our featured products and creative marketing from the show.
